

OBJECTIVE

Primary objective is capital appreciation with higher risk tolerance. Profile is similar to that of an aggressively positioned, all-equity portfolio.

INVESTMENT PHILOSOPHY

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification. The Confluence approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return and yield looking forward 3 years. This cyclical approach is not market *timing*. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in much shorter time frames, depending upon changing views of the marketplace and economy. Alternately, we may abstain from making significant allocation adjustments if we believe the existing posture remains optimal. The process may involve somewhat higher turnover than a more static strategic program, but usually involves less trading relative to tactical approaches.

The asset allocation portfolios utilize exchange-traded funds (ETFs). We may use ETFs that allow us to focus on or avoid particular industry sectors, bond maturities, commodities or countries.

OVERVIEW

- ◆ Focused on capital appreciation and can tolerate high levels of risk
- ◆ Allocation may include domestic and foreign equity asset classes, as well as commodities, real estate and occasionally fixed income investments
- ◆ At times, may be more concentrated in asset classes with higher return potential, including those with higher levels of volatility
- ◆ Profile is similar to that of an aggressively positioned, all-equity portfolio
- ◆ Appropriate for equity-oriented investors with a higher risk tolerance

ASSET ALLOCATION¹

CHARACTERISTICS¹

Weighted SEC Yield	1.3%
Number of Securities	12
Annual Turnover (3-Year Rolling)	71%

5 LARGEST HOLDINGS¹

SPDR® S&P 600 Small Cap Value ETF - SLYV	19.5%
iShares Core MSCI Emerging Markets - IEMG	15.0%
iShares MSCI Emerging Mkts ex-China - EMXC	15.0%
SPDR® Developed World ex-US ETF - SPDW	15.0%
SPDR® S&P 600 Small Cap Growth ETF - SLYG	10.5%

¹This information is presented as supplemental information to the disclosures required by the GIPS® standards. Information presented reflects wrap account composites with "Plus" strategies & taxable income (if applicable). Asset allocations shown represent the individual ETFs used in the model portfolios as of 7/20/2021 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The allocation of assets in the model portfolio may be changed from time to time due to market conditions and economic factors. The investments held by the portfolio are not guaranteed and do carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. The listing of "5 Largest Holdings" is not a complete list of all ETFs in the portfolio or which Confluence may be currently recommending. Application of the investment strategy as of a later date will likely result in changes to the listing. Individual client portfolios may differ, sometimes significantly, from these listings. Contact Confluence for a complete list of holdings. Yield data source: Morningstar. 30-day SEC yield for the model portfolio as of 7/20/2021. Annual turnover 3-year rolling calculated from sample accounts for periods ending 12/31/2020.

HISTORICAL MODEL ALLOCATIONS²

²These allocations reflect the model asset allocations over time. The allocations do not represent actual trading, as actual investment results vary from model results due to inherent limitations in sector, industry and asset class ETF securities that do not perfectly replicate a selected asset class. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The allocation of assets in the model portfolios may be changed from time to time due to market conditions and economic factors. The investments held by the portfolios are not guaranteed and do carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. ETFs trade like a stock but charge internal management fees; there will be brokerage commissions associated with buying and selling ETFs unless trading occurs in a fee-based account. This information is presented as supplemental information to the disclosures required by the GIPS® standards.

ABOUT CONFLUENCE INVESTMENT MANAGEMENT LLC

Confluence Investment Management is an independent Registered Investment Advisor located in St. Louis, Missouri, that provides professional portfolio management and advisory services to institutional and individual clients. Confluence's investment philosophy is based upon independent, fundamental research that integrates evaluation of market cycles, macroeconomics and geopolitical analysis with the firm's value-driven approach. The investment team's portfolio management philosophy begins by addressing risk and follows through by positioning clients to achieve income and growth objectives.

THIRD QUARTER 2021 AGGRESSIVE GROWTH MARKET OBSERVATIONS

- ◆ There is no recession within our forecast period. Monetary and fiscal stimulus should continue in the U.S. over our three-year forecast period, yet at a decreasing rate as the economy recovers.
- ◆ After a surge in inflation this year and into next year, resulting from the economic recovery following the pandemic, inflation should settle within the Fed's threshold.
- ◆ The ECB remains aggressively accommodative and is supported by the EU's fiscal stimulus, which should help to hasten the pace of their economic recovery.
- ◆ Equity allocations among all strategies remain elevated with the retention of a heavy tilt toward value and, where risk appropriate, an overweight to small capitalization stocks.
- ◆ The high allocation to international stocks remains intact given our expectations of overseas growth.
- ◆ In the more risk-tolerant strategies where emerging market exposure is employed, mainland Chinese stocks are either vastly underweighted or excluded.
- ◆ Commodity exposure is retained, with heavier concentration in the more risk-averse strategies, for the advantages they afford during heightened geopolitical risk.

The Aggressive Growth strategy maintains the same allocations as last quarter. The one trade occurred in emerging market stocks where we sold a security mirroring the broad emerging market exposure in favor of one that does not have exposure to mainland China. The strategy retains its overweights to U.S. small cap and international stocks, inclusive of emerging markets. We retain the allocation to precious metals not only for the benefits it affords in the event of heightened geopolitical risk, but also for the attraction silver holds as an industrial commodity during a global economic recovery.

Information provided in this report is for educational and illustrative purposes only and should not be construed as individualized investment advice or a recommendation. The investment or strategy discussed may not be suitable for all investors. Investors must make their own decisions based on their specific investment objectives and financial circumstances. Opinions expressed are current as of the date shown and are subject to change.

Portfolio Benchmark

The benchmark is the S&P 500® Index (Source: Bloomberg)

The benchmark was changed retroactively on 7/1/13 to be more simplified. The custom benchmark prior to 7/1/13 was calculated monthly and consisted of: S&P 500 38%, S&P 400 20%, Russell 2000 20%, MSCI EAFE (gross) 15%, MSCI Emerging Markets (gross) 5%, and ML T-Bill 2%. Inflation is provided as additional information and is represented by the U.S. 5-year TIP breakeven spread (Bloomberg: USGGBE05 Index), which had 3-year standard deviation as follows: 0.1% 2011, 0.1% 2012, 0.1% 2013, 0.1% 2014, 0.1% 2015, 0.1% 2016, 0.1% 2017, 0.1% 2018, 0.1% 2019, 0.1% 2020.

Confluence Investment Management LLC claims compliance with the Global investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2019. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Aggressive Growth Strategy was inception on August 1, 2008, and the current Aggressive Growth-Plus Composite was created on April 1, 2009. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

¹Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.

²Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 0.40% on the first \$500,000; 0.35% on the next \$500,000; and 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Bundled fee accounts make up 100% of the composite for all periods. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

Performance prior to April 1, 2009, is based on the Aggressive Growth-Foundation-Direct Composite which was created on August 1, 2008. This composite includes accounts that pursue the Aggressive Growth strategy, but have a different fee structure and have a smaller balance so they forgo the sector-specific breakout of equity market allocations. Gross returns from the Aggressive Growth-Foundation-Direct Composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly.

A complete list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period. The Aggressive Growth-Plus Composite contains fully discretionary Aggressive Growth-Plus wrap accounts. The Aggressive Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Aggressive Growth strategy. The allocation is implemented using ETFs and may include domestic and international equity asset classes, as well as commodities, real estate and occasionally, fixed income investments. This portfolio may be appropriate for equity-oriented investors with a higher risk tolerance. **Results shown for the year 2008 represent partial period performance from August 1, 2008, through December 31, 2008. N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.
