INVESTMENT PROCESS

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification, while positioning portfolios to achieve growth, income and other client-specific objectives. The Confluence approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return and yield looking forward three years. This cyclical approach is not market timing. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in much shorter time frames, depending upon changing views of the marketplace and economy. Alternately, we may abstain from making significant allocation adjustments if we believe the existing posture remains optimal. The process may involve somewhat higher turnover than a more static strategic program, but usually involves less trading relative to tactical approaches. The asset allocation portfolios utilize exchange-traded funds (ETFs). We may use ETFs that allow us to focus on or avoid particular industry sectors, bond maturities, commodities, or countries.

GROWTH & INCOME¹

Intermediate Term

the model portfolios as of 1/21/20 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The allocation of assets in the model portfolio may be changed from time to time due to market conditions and economic factors. The investments held by the portfolio are not guaranteed and carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. 2Yield data source: Morningstar. 30-day SEC yield for the model portfolio as of 1/21/20. 3Annual turnover 3-year rolling calculated from sample accounts for periods ending 12/31/2019. 4The listing of "5 Largest Holdings" is not a complete list of all ETFs in the portfolio or which Confluence may be currently recommending. Application of the investment strategy as of a later date will likely result in changes to the listing. Individual client portfolios may differ, sometimes significantly, from these listings. Contact Confluence for a complete list of holdings.

Performance prior to April 1, 2009 is based on the Aggressive Growth-Foundation-Direct Composite which wa							

*Average Annualized Returns **Inception: Income with Growth (12/1/08), Growth & Income (9/1/08), Growth (9/1/08), Aggressive Growth (8/1/08). Results shown for calendar-year 2008 represent partial period performance: Income with Growth: 12/1/2008 thru 12/31/2008; Growth & Income: 9/1/2008 thru 12/31/2008; Growth: 9/1/2008 thru 12/31/2008; Aggressive Growth: 8/1/2008 thru 12/31/2008

created on August 1, 2008. This composite includes accounts that pursue the Aggressive Growth Strategy, but have a different fee structure and have a smaller balance so they forgo the sector specific breakout of equity market allocations. Gross returns from the Aggressive Growth-Foundation-Direct composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly.

About Confluence Investment Management LLC

Confluence Investment Management LLC is an independent Registered Investment Advisor located in St. Louis, Missouri, that provides professional portfolio management and advisory services to institutional and individual clients. Confluence's investment philosophy is based upon independent, fundamental research that integrates evaluation of market cycles, macroeconomics and geopolitical analysis with the firm's value-driven approach. The investment team's portfolio management philosophy begins by addressing risk and follows through by positioning clients to achieve income and growth objectives.

Confluence claims compliance with the Global Investment Performance Standards (GIPS®) ¹This information is presented as supplemental information to the disclosures required by the GIPS ® standards. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. The U.S. dollar is the currency used to express performance. Returns are presented gross-of-fees and net-of-fees and include the reinvestment of all income. Pure gross-of-fees returns are shown as supplemental information. 2Net-of-fees performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 0.40% on the first \$500,000; 0.35% on the next \$500,000; and 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net-of-fees. Bundled fee accounts make up 100% of the composite for all periods. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. A GIPS-compliant presentation and/or the firm's list of composite descriptions are available upon request. Additional information regarding policies for calculating and reporting returns is available upon request. Past performance is not indicative of future results. Asset Allocation strategies are implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the respective strategy. Income Taxable With Growth: while majority of its allocation is typically in taxable fixed-income asset classes, a smaller portion may include real estate, equities, commodities or other asset classes; this minority allocation provides an aspect of growth potential, along with diversification benefits; may be appropriate for investors with a conservative risk tolerance. Growth & Income Taxable: growth allocation may include equity asset classes ranging from small cap to large cap, with both domestic and international equities; commodities may be utilized for total return as well as diversification benefits; fixed-income and real estate allocations will normally form the foundation to pursue taxable income objectives; may be appropriate for investors with a moderate risk tolerance. Growth: may include equity asset classes ranging from small cap to large cap; international allocations may include both developed and emerging markets, while commodities, real estate and fixed income may be utilized for total return and diversification; may be appropriate for equity-oriented investors with an average risk tolerance. Aggressive Growth: may include domestic and international equity asset classes, as well as commodities, real estate and, occasionally, fixed income investments; may be appropriate for equity-oriented investors with a higher risk tolerance.

Benchmarks changed retroactively on 7/1/13 to be more simplified. Inflation provided as additional information and represented by US 5-year TIP breakeven spread (Bloomberg: USGGBE05 Index), which had 3-year standard deviation as follows: 0.1% 2011, 0.1% 2012. 0.1% 2013, 0.1% 2014, 0.1% 2015, 0.1% 2016, 0.1% 2017, 0.1% 2018, 0.1% 2019.
