

ASSET ALLOCATION STRATEGIES

THIRD QUARTER 2022

INVESTMENT PHILOSOPHY

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification, while positioning portfolios to achieve growth, income, and other client-specific objectives. Confluence’s approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return, and yield looking forward three years. This cyclical approach is not market *timing*. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in shorter time frames, depending upon changing views of the marketplace and economy, or alternately we may abstain from significant allocation adjustments if we believe the existing posture remains optimal. The asset allocation portfolios utilize exchange-traded funds (ETFs), which allow us to focus on or avoid particular industry sectors, bond maturities, commodities, or countries.

STRATEGY	INCOME	INCOME WITH GROWTH	GROWTH & INCOME	GROWTH	AGGRESSIVE GROWTH
Investment Objective	Primary focus is income, along with preservation of capital & low volatility	Primary focus is on reliable income with a secondary focus on growth	Combines growth & income objectives, with more emphasis on growth	Primary objective is capital appreciation	Primary objective is capital appreciation with higher risk tolerance
Profile	Similar to a well-diversified bond portfolio alongside limited exposure to other asset classes	Similar to a well-diversified bond portfolio alongside an equity allocation	Similar to a portfolio with a blend of stocks & bonds	Similar to a diversified all-equity portfolio	Similar to an aggressively positioned, all-equity portfolio
Portfolio Allocations	Majority allocation in fixed income asset classes	Allocations may include fixed income, usually with emphasis on U.S. investment-grade fixed income, U.S. & international equities, real estate & commodities	Allocations may include U.S. & international equities, commodities, real estate & fixed income investments	Allocations may include any asset classes, but typically weighted toward equities, usually with emphasis on U.S. large caps	Allocations may include any asset classes, but typically weighted toward equities, sometimes in concentrated allocations
Benchmark	20% equity / 80% bond	40% equity / 60% bond	70% equity / 30% bond	100% equity	100% equity
Volatility Ceiling	7.0%	10.0%	14.0%	17.0%	20.0%
Yield Target	Intermediate-Term Bond	Short-Term Bond	Short-Term Bond & Cash Average	N/A	N/A

¹This information is presented as supplemental information to the disclosures required by the GIPS® standards. Asset allocations shown represent the individual ETFs used in the model portfolios as of 7/19/22 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The allocation of assets in the model portfolio may be changed from time to time due to market conditions and economic factors. The investments held by the portfolio are not guaranteed and carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns.

Inflation is provided as additional information and is represented by the U.S. 5-year TIP breakeven spread (Bloomberg: USGGBE05 Index), which had 3-year standard deviation as follows: 0.1% 2011, 0.1% 2012, 0.1% 2013, 0.1% 2014, 0.1% 2015, 0.1% 2016, 0.1% 2017, 0.1% 2018, 0.1% 2019, 0.1% 2020, 0.2% 2021.

DISCLOSURES

Confluence Investment Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2021. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The *Income Taxable* strategy was inceptioned on January 1, 2018, and the current Income Taxable-Plus Composite was created on July 1, 2019. The *Income Taxable with Growth-Plus* strategy was inceptioned on December 1, 2008, and the Income Taxable with Growth-Plus Composite was created on December 1, 2008. The *Growth and Taxable Income-Plus* strategy was inceptioned on September 1, 2008, and the Growth and Taxable Income-Plus Composite was created on September 1, 2008. The *Growth* strategy was inceptioned on September 1, 2008, and the Growth-Plus Composite was created on September 1, 2008. The *Aggressive Growth* strategy was inceptioned on August 1, 2008, and the current Aggressive Growth-Plus Composite was created on April 1, 2009. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

² Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.

³ Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 0.40% on the first \$500,000; 0.35% on the next \$500,000; and 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Bundled fee accounts make up 100% of the composite for all periods for *Income Taxable with Growth*, *Growth and Taxable Income*, *Growth*, and *Aggressive Growth* (*Income Taxable*: Subsequent to July 1, 2019, bundled fee accounts make up 100% of the composite). Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

Income Taxable: Performance prior to July 1, 2019, is based on the Income Taxable-Direct Composite which was created on January 1, 2018. This composite includes accounts that pursue the Income strategy, but have a different fee structure. Gross returns from the Income Taxable-Direct Composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. The Income Taxable-Plus Composite contains fully discretionary Income Taxable-Plus wrap accounts. The Income Taxable strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Income Taxable strategy. Although the portfolio typically has the majority of its allocation in taxable fixed income asset classes, a smaller portion of the portfolio may include real estate, equities, commodities or other asset classes. This minority allocation provides an aspect of growth potential, along with diversification benefits. This portfolio may be appropriate for investors with a conservative risk tolerance.

Income Taxable with Growth: The Income Taxable with Growth-Plus Composite contains fully discretionary Income Taxable with Growth-Plus wrap accounts. The Income Taxable with Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Income Taxable with Growth strategy. Although the portfolio typically favors an allocation to taxable fixed income asset classes, a smaller portion of the portfolio may include real estate, equities, commodities or other asset classes. These allocations provide an aspect of growth potential, along with diversification benefits. This portfolio may be appropriate for investors with a conservative risk tolerance.

Growth and Taxable Income: The Growth & Taxable Income-Plus Composite contains fully discretionary Growth & Taxable Income-Plus wrap accounts. The Growth & Income Taxable strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Growth & Income Taxable strategy. The growth allocation may include equity asset classes ranging from small cap to large cap, with both domestic and international equities. Commodities may be utilized for total return as well as diversification benefits. Fixed income and real estate allocations will normally form the foundation to pursue taxable income objectives. This portfolio may be appropriate for investors with a moderate risk tolerance.

Growth: The Growth-Plus Composite contains fully discretionary Growth-Plus wrap accounts. The Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Growth strategy. The allocation may include equity asset classes ranging from small cap to large cap. International allocations may include both developed and emerging markets, while commodities, real estate and fixed income may be utilized for total return and diversification. This portfolio may be appropriate for equity-oriented investors with an average risk tolerance.

Aggressive Growth: Performance prior to April 1, 2009, is based on the Aggressive Growth-Foundation-Direct Composite which was created on August 1, 2008. This composite includes accounts that pursue the Aggressive Growth strategy, but have a different fee structure and have a smaller balance so they forgo the sector-specific breakout of equity market allocations. Gross returns from the Aggressive Growth-Foundation-Direct Composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. The Aggressive Growth-Plus Composite contains fully discretionary Aggressive Growth-Plus wrap accounts. The Aggressive Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Aggressive Growth strategy. The allocation is implemented using ETFs and may include domestic and international equity asset classes, as well as commodities, real estate and occasionally, fixed income investments. This portfolio may be appropriate for equity-oriented investors with a higher risk tolerance.

A complete list of composite descriptions and policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period.

**Results shown for the year 2008 represent partial period performance from strategy inception date through December 31, 2008. N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.
