

Confluence Investment Management

Firm Profile

About Us

Confluence Investment Management LLC is an independent Registered Investment Adviser. Confluence provides professional portfolio management and advisory services to institutional and individual clients. Although the firm was founded in 2007, the Confluence team has more than 400 years of combined financial experience and 200 years of portfolio management experience, maintaining a proven track record that dates back to 1994.

The investment team at Confluence specializes in equity portfolio management, asset allocation portfolio management and alternative investment management. As of March 31, 2018, Confluence had \$8.2 billion dollars in assets under management and supervision.

Our Investment Approach

The firm's investment philosophy is based upon independent, fundamental research that integrates the firm's evaluation of market cycles, macroeconomics and geopolitical analysis with its value-driven, fundamental company-specific approach. Confluence's portfolio management philosophy begins by assessing risk, and follows through by positioning clients to achieve their income and growth objectives.

The firm combines top-down and bottom-up analytics in an integrated process that considers both the big picture, as well as the smaller details. This discipline enables the investment team to identify broad risks, while taking advantage of specific opportunities.

Product Overview

Confluence offers a variety of investment solutions, including separately managed account portfolios, with a range of investment objectives that allow clients to select a portfolio that best suits their individual investment goals.

Investment & Leadership Teams

Confluence is made up of experienced investment professionals who are dedicated to an exceptional level of client service and communication. Maintaining strong solidarity pre-dating the formation of Confluence, the core investment team led by Mark Keller managed assets across various equity and asset allocation strategies while at their prior firm. Confluence's disciplined investment process and performance has stood the test of time across a broad range of economic and market cycles.

John Laux, Senior Trader & Options Specialist	30	0

Equity Strategies

Confluence's investment philosophy for its equity strategies seeks to identify "great companies" at bargain prices. In-depth proprietary research focuses on companies that consistently generate high levels of cash flow, maintain competitive advantages enabling pricing power, and possess seasoned management teams that have demonstrated the wise use of excess capital. Confluence looks to invest in these quality companies at attractive valuations. Over time, we believe this approach helps position the portfolio to deliver superior risk-adjusted returns.

Alternative Strategies

Management of these strategies begins with top-down evaluations of the geopolitical environment, fundamental macroeconomic trends and technical patterns in the target markets. The Global Hard Assets portfolio is focused on investments in hard assets which Confluence defines as tangible commodities, such as a gold bar, a barrel of oil or a ton of coal. The Specialty Finance BDC portfolio is focused on a niche of the financial sector where companies lend and invest in the private debt and equity markets.

Asset Allocation

Confluence's approach to asset allocation incorporates forward-looking analytics to estimate the performance of 12 different asset classes in terms of risk, return and yield. This cyclical approach recognizes that intermediate trends can diverge significantly from long-term averages. Our intention is to optimize potential return while remaining within an acceptable risk profile. Confluence utilizes exchange-traded funds (ETFs), which allow us to focus on or avoid particular industry sectors, bond maturities, commodities or countries. The investment team's experience in managing ETF-based asset allocation programs dates back to 2001.
