* Assets under management = \$6.3 billion;
Assets under advisement = \$3.2 billion

Our Investment Approach

The firm's investment philosophy is based upon independent, fundamental research that integrates evaluation of market cycles, macroeconomics and geopolitical analysis with a value-driven, company-specific approach. Confluence's portfolio management philosophy begins by assessing risk, and follows through by positioning clients to achieve their income and growth objectives.

The firm combines top-down and bottom-up analytics in an integrated process that considers both the big picture as well as the smaller details. This discipline enables the investment committees to identify broad risks, while taking advantage of specific opportunities.

Our Team

Confluence is made up of experienced investment professionals dedicated to an exceptional level of client service and communication, led by Mark Keller, Chief Investment Officer & CEO, and Brian Hansen, President & Chief Operating Officer. Maintaining strong solidarity pre-dating the formation of Confluence, the core investment team managed assets across various equity and asset allocation strategies while at their prior firms. Confluence's disciplined investment process and performance has stood the test of time across a broad range of economic and market cycles.

- ◆ 46 employees
- ◆ Research-intensive & team-driven
- ◆ 27 years average investment experience

Investment Strategies

Value Equities | Confluence's value equity investment philosophy seeks to identify "great companies" at bargain prices. In-depth proprietary research focuses on companies that consistently generate high levels of cash flow, maintain competitive advantages enabling pricing power and possess seasoned, capable management teams that have demonstrated the ability to effectively allocate capital. We look to invest in these quality companies at attractive valuations. Over time, we believe this approach helps position portfolios to deliver superior risk-adjusted returns.

Dustin Hausladen, Equity Analyst	16
Kaisa Stucke, CFA, Equity Analyst	13
Blair Brumley, CFA, Equity Analyst	34
Brett Mawhiney, CFA, Equity Analyst	12

Fixed Income Solutions | Our Fixed Income strategy strives to deliver the income and lower volatility traditionally available from a diversified bond portfolio utilizing fixed income ETFs. It is offered as either a standalone portfolio or as a component in our Balanced Accounts, which combine equity and fixed income exposure in a single account. Clients in Balanced Accounts indicate the proportion of their portfolio to allocate to fixed income paired with one of our Value Equity strategies, with varying allocation ranges available.

Alternative Investments | Management begins with top-down evaluations of the geopolitical environment, fundamental macroeconomic trends and technical patterns in the target markets. Strategies may be focused on particular sectors or niches.

Asset Allocation | Confluence's approach to asset allocation is an adaptive process, evaluating economic and market variables in a forward-looking context to estimate the performance of 12 different asset classes in terms of risk, return and yield. This cyclical approach recognizes that intermediate trends can diverge significantly from long-term averages. Our intention is to optimize potential return, while remaining within an acceptable risk profile. We offer a of risk profiles, utilizing exchange-traded funds (ETFs) to focus on or avoid particular industry sectors, bond maturities, commodities or countries.

David Miyazaki, CFA, Portfolio Manager	29
Patty Dahl, Chief Financial Officer	32
Patrick Fearon-Hernandez, Market Strategist	33
Kaisa Stucke, CFA, Equity Analyst	13

International Equities | The international equity investment philosophy is rooted in a fundamental approach focused on owning large, high-quality, growth-oriented companies at reasonable valuations. We believe higher quality companies will outperform the broader market over the long-term, especially when the countries in which they do business benefit from favorable macroeconomic factors. The process integrates top-down comprehensive evaluation of market cycles, macroeconomic variables and geopolitical analysis with the firm's fundamental, company-specific approach.
