

OBJECTIVE

Combines objectives of growth and income, with more emphasis on growth, using tactical ETFs that are focused on generating alpha relative to an index rather than delivering the beta of the underlying index.

INVESTMENT PHILOSOPHY

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification. The Confluence approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return, and yield looking forward 3 years. This cyclical approach is not market *timing*. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in much shorter time frames, depending upon changing views of the marketplace and economy. Alternately, we may abstain from making significant allocation adjustments if we believe the existing posture remains optimal. The process may involve somewhat higher turnover than a more static strategic program, but usually involves less trading relative to tactical approaches.

The asset allocation portfolios utilize exchange-traded funds (ETFs). We may use ETFs that allow us to focus on or avoid particular industry sectors, bond maturities, commodities, or countries.

OVERVIEW

- ◆ Combines objectives of growth and income, with more emphasis on growth
- ◆ Balances longer term perspective of a cyclical asset allocation model with tactical ETFs focused on generating alpha relative to an index, rather than delivering the beta
- ◆ Growth allocation may include equity asset classes ranging from small cap to large cap, with both domestic and international equities
- ◆ Commodities may be utilized for total return and diversification benefits
- ◆ Fixed income and real estate will normally form the foundation to pursue income objectives
- ◆ Profile is similar to that of a portfolio with a blend of stocks and bonds
- ◆ Appropriate for investors with a moderate risk tolerance
- ◆ Strategy assets: \$53.9 million¹

¹ Total strategy assets include assets under management (AUM) and assets under advisement (AUA). As of 12/31/23, AUM = \$0.2 million and AUA = \$53.7 million.

OVERALL MORNINGSTAR RATING™

Among 352 separate accounts in the Moderately Aggressive Allocation category. This separate account was rated 4 stars/352 separate accounts (3 years), 5 stars/319 separate accounts (5 years) based on risk-adjusted returns. As of 12/31/23. ⁷

CURRENT PORTFOLIO²

(As of 4/25/2024 rebalance)

See GIPS Report on pages 2-3.

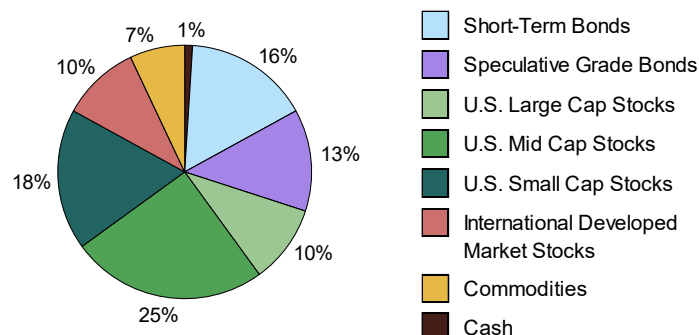

CHARACTERISTICS

Weighted SEC Yield	2.8%
Volatility Ceiling	14.0%
Number of Securities	18
Annual Turnover (3-Year Rolling as of 12/31/23)	86%

5 LARGEST HOLDINGS

Invesco S&P Midcap Quality ETF - XMHQ	14.0%
iShares BB Rated Corporate Bond ETF - HYBB	13.0%
First Trust Small Cap Value AlphaDEX® ETF - FYT	11.7%
First Trust Dev Markets Ex-US AlphaDEX® ETF - FDT	8.0%
iShares 1-3 Year Treasury Bond - SHY	8.0%

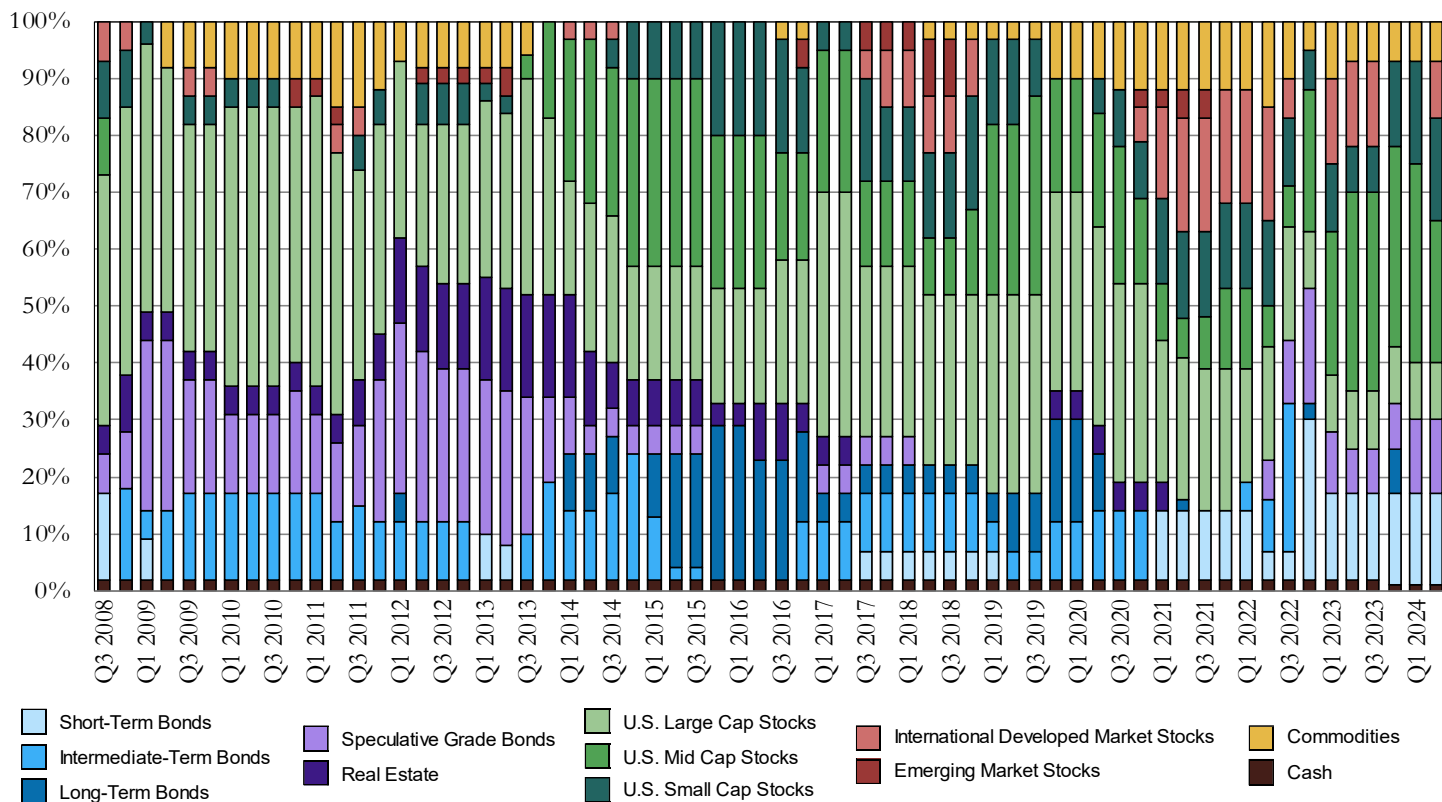

ASSET ALLOCATION

RECENT PORTFOLIO CHANGES³

The investment-grade fixed income segment of Growth & Income Alpha is exclusively in short-term bonds with a balance of corporates and Treasuries. We retain BB-rated speculative grade bonds for their yield diversification. US large caps remain overweight Aerospace & Defense, Energy, and Cybersecurity, while mid-cap equities maintain their emphasis on a quality factor with an overweight to uranium producers. We retain the US small cap equity positions, focusing on companies with robust free cash flow given potentially rising debt-servicing costs. International developed stocks were introduced with an overweight to Japan. Gold continues to serve as a haven for elevated geopolitical risk and is further supported by global central bank purchases.

DISCLOSURES

²Current Portfolio—Information presented reflects wrap account composites with taxable income (if applicable). Asset allocations shown represent the individual ETFs used in the model portfolios as of 4/25/24 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The investments held by the portfolio are not guaranteed and do carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. Individual client portfolios may differ, sometimes significantly, from these listings. Yield data source: Morningstar. 30-day SEC yield of the model portfolio as of 4/25/24. Annual turnover 3-year rolling calculated from sample accounts for periods ending 12/31/2023.

³Recent Portfolio Changes—The investment or strategy may not be suitable for all investors. Investors must make their own decisions based on their specific investment objectives and financial circumstances.

⁴Performance Composite Returns—Confluence Investment Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2022. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

The Growth & Income Taxable Alpha-Plus Strategy was inceptioned on May 1, 2014, and the current Growth & Income Taxable Alpha-Plus Composite was created on April 1, 2015. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

⁵Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.

⁶Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 0.40% on the first \$500,000; 0.35% on the next \$500,000; and 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. From April 1, 2015, to September 30, 2016, bundled fee accounts made up 100% of the composite. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

Performance prior to April 1, 2015, and after September 30, 2016, is based on the Growth & Income Taxable Alpha-Plus-Direct Composite which was created on May 1, 2014. This composite includes accounts that pursue the Growth & Income Taxable Alpha-Plus strategy, but do not have bundled fees. Gross returns from the Growth & Income Taxable Alpha-Plus-Direct Composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. A complete list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period. The Growth & Income Taxable Alpha-Plus Composite contains fully discretionary Growth & Income Taxable Alpha-Plus wrap accounts. The Growth & Income Taxable Alpha-Plus strategy is implemented using "Alpha" ETFs that seek to outperform an underlying index. The investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Growth & Income Taxable Alpha-Plus strategy. The growth allocation may include equity asset classes ranging from small cap to large cap, with both domestic and international equities. Commodities may be utilized for total return as well as diversification benefits. Fixed income and real estate allocations will normally form the foundation to pursue taxable income objectives. This portfolio may be appropriate for investors with a moderate risk tolerance.

The benchmark was changed retroactively on 1/1/24 due to wider market adoption and transparency of the underlying constituents. The custom benchmark prior to 1/1/24 was calculated monthly and consisted of: S&P 500 70% and 30% ICE BofA U.S. Corporate, Government, and Mortgage Bond Index. Inflation was removed prior to 1/1/24 and had been provided as additional information and was represented by the U.S. 5-year TIP breakeven spread.

**Results shown for the year 2014 represent partial period performance from May 1, 2014, through December 31, 2014. N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.

⁷Overall Morningstar Rating™—Information provided is for educational/illustrative purposes only and should not be construed as individualized advice, recommendation, or endorsement of any investment strategy. Information is not intended to forecast or predict future performance. Past performance is no guarantee of future results. Ratings are objective, based entirely on a mathematical evaluation of past performance, and based on gross-of-fees performance (before deduction of advisory fees). Net performance information is available on the Confluence website. Ratings should not be considered a buy or sell recommendation. Confluence provides compensation to Morningstar, Inc. for use of their analytics systems/database as well as for permission to publish these ratings.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

The Morningstar Rating™, or "star rating," is calculated for separate accounts with at least a three-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. As of 12/31/2023.
