

OBJECTIVE

Dividend-based equity strategy combined with a covered call option strategy on the S&P 500 Index. Focused on generating total return with lowered risk and volatility than the broader market.

INVESTMENT PHILOSOPHY

IDEA Plus combines a diversified, stable and increasing dividend equity strategy (Confluence IDEA) with a covered call option strategy to reduce volatility.

The investment philosophy builds upon the required criteria established to create the initial IDEA investable universe. Stocks selected for the strategy are diversified across a variety of sectors, avoiding excess concentrations in particular industries. Companies typically have well-positioned business models, ones that can grow during economic expansions and persevere through recessions and industry downturns. Valuations play an important role, as we believe avoiding excessive valuations is a key metric in managing risk. We also focus on companies where debt levels are manageable. The result is a diversified portfolio of high-quality companies operating stable businesses from which they can offer the prospect of rising dividends to shareholders.

The IDEA strategy coupled with the covered call strategy produces a compelling portfolio with comparable returns to the S&P 500 with less risk.

OVERVIEW

- ◆ Approximately 75% of portfolio: IDEA strategy, which invests in high-quality businesses with long track records of distributing earnings to shareholders through dividends
- ◆ Remaining 25% of portfolio: ETF position in the S&P 500 Index with a corresponding covered call position (currently SPDR S&P 500 ETF [NYSE: SPY]); can range 15%-40%
- ◆ Market capitalizations greater than \$1 billion
- ◆ Approximately 1.5% position sizes
- ◆ New account fully invested at inception
- ◆ Low turnover
- ◆ Anticipated dividend growth rate of the aggregate portfolio is important since inflation can erode investment returns and lower purchasing power; however, because the targeted portfolio dividend growth rate is higher than inflation, real income to investors can grow over time
- ◆ Appropriate for clients who are willing to limit upside potential in exchange for downside protection

CHARACTERISTICS¹

	IDEA PLUS
Dividend Yield	1.8%
Number of Positions	50

¹Information presented as supplemental information to the disclosures required by the GIPS® standards. Investing in securities involves the risk of loss that investors should be prepared to bear. There can be no assurance that any investment objective will be achieved or that any investment will be profitable or avoid incurring losses. "10 Largest Holdings" is not a complete list of all stocks in the portfolio or which Confluence may be currently recommending. Application of the investment strategy as of a later date will likely result in changes to the listing. Sector weightings and holdings of individual client portfolios in the strategy may differ, sometimes significantly, from these listings. Contact Confluence for a complete list of holdings. Portfolio yield: composite level weighted average yield, calculated based on annualized current dividends; source: FactSet. Includes dividends from common stock holdings and SPY but does not include premiums received from writing covered calls. Market Cap statistics do not include holdings within the S&P 500 Index ETF (IDEA portion of portfolio only). Sector Allocation does include holdings within the SPDR S&P 500 ETF (NYSE: SPY), based off model assuming 75% IDEA strategy and 25% SPY.

MARKET CAP¹

IDEA PLUS

Weighted Avg. Market Cap (\$B)	205.2
Largest Market Cap (\$B)	1,778.2
Median Market Cap (\$B)	70.4

Large Cap (>\$10B)	92%
Mid Cap (\$10B-\$2B)	9%
Small Cap (<\$2B)	0%

10 LARGEST HOLDINGS¹

S&P 500 Index ETF - SPDR (SPY)	29.8%
Snap-on Incorporated	1.7%
The Charles Schwab Corporation	1.6%
Polaris Inc.	1.6%
The Home Depot, Inc.	1.6%
Expeditors Int'l of Washington, Inc.	1.6%
T. Rowe Price Group, Inc.	1.6%
Commerce Bancshares, Inc.	1.6%
Illinois Tool Works Inc.	1.6%
Accenture plc	1.6%

SECTOR ALLOCATION¹

INVESTMENT PROCESS

IDEA SECURITY SCREEN CRITERIA

Approximately 75% of portfolio is the IDEA strategy. The initial security screen for the IDEA portfolio includes the following criteria:

Consistent, Growing Dividends:

- ◆ Consecutive dividends paid over the last 10 years
- ◆ No dividend reductions in the last 10 years
- ◆ Dividend raised in 7 of the last 10 years
- ◆ Dividend yield greater than 1%

IDEA Criteria Indicate:

- ◆ Stable and growing cash flow
- ◆ High-quality companies
- ◆ Moderate to low levels of debt

Based on internal research, the portfolio management team can make special exceptions for companies that have growing dividends but do not pass all of the initial security screen criteria.

IDEA PLUS (COVERED CALL STRATEGY)

Remaining 25% consists of an ETF position in the S&P 500 Index with corresponding covered call position (allocation can range, at times, from 15% to 40% of the portfolio).

Covered Call Strategy:

- ◆ Sells (writes) call option contracts on the S&P 500 Index ETF shares, giving an option buyer the right, but not obligation, to buy the shares at a set price (strike price) until the option expires
- ◆ Covered calls sold only on the S&P 500 Index ETF position, preserving the capital appreciation potential of the IDEA portfolio and only limiting the upside potential of the S&P 500 Index ETF
- ◆ Covered call positions are actively managed to maximize strike and term considerations
- ◆ Option contracts can be rolled prior to expiration to limit the probability of assignment

HOW IS IDEA PLUS DIFFERENT?

- ◆ Designed to reduce volatility of the IDEA strategy
- ◆ Covered calls cushion declines in the portfolio in down markets
- ◆ As a result, IDEA Plus will likely *outperform* IDEA strategy in flat to down markets and *underperform* IDEA in rising markets
- ◆ Call premium will fluctuate depending on price volatility of S&P 500 Index ETF and strike price relative to prevailing ETF price
- ◆ Minimum account size requirement is \$150,000

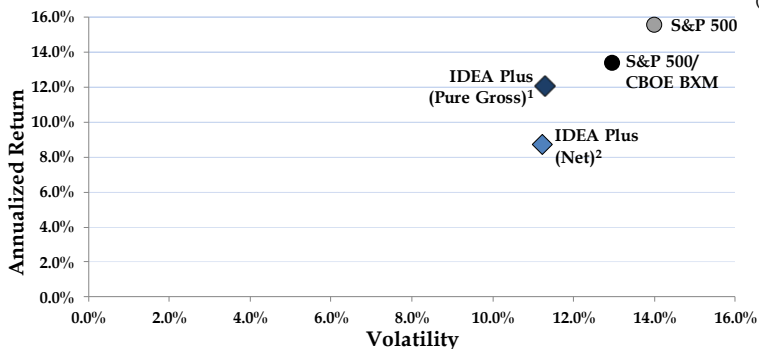

ABOUT CONFLUENCE INVESTMENT MANAGEMENT LLC

Confluence Investment Management is an independent Registered Investment Advisor located in St. Louis, Missouri, that provides professional portfolio management and advisory services to institutional and individual clients. Confluence's investment philosophy is based upon independent, fundamental research that integrates evaluation of market cycles, macroeconomics and geopolitical analysis with the firm's value-driven, company-specific approach. The portfolio management philosophy begins by assessing risk and follows through by positioning clients to achieve their income and growth objectives.

Portfolio Benchmark

Custom benchmark (calculated monthly) consists of a blend of 75% S&P 500 and 25% CBOE S&P 500 BuyWrite Index (BXW). (Source: Bloomberg)
S&P 500[®] Index – A capitalization-weighted index of 500 stocks designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries. (Source: Bloomberg)
CBOE S&P 500 BuyWrite[®] Index (BXW) – A passive total return index based on buying an S&P 500 stock index portfolio, and then writing (or selling) the near-term S&P 500 Index covered call option every month with an exercise price just above the prevailing index level (i.e., slightly out of the money). (Source: CBOE)

Confluence Investment Management LLC claims compliance with the Global Investment Performance Standards (GIPS[®]) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2019. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS[®] is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. The Increasing Dividend Equity Account (IDEA) Plus strategy was inceptioned on December 1, 2011, and the current IDEA Plus Composite was created on February 1, 2012. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

¹ Pure gross returns are shown as supplemental information to the disclosures required by the GIPS[®] standards.
² Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is: 1.00% on the first \$500,000; 0.90% on the next \$500,000; and 0.75% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Prior to February 1, 2012, bundled fee accounts make up 0% of the composite. Subsequent to this date, bundled fee accounts make up 100% of the composite. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor. Performance prior to February 1, 2012, is based on the IDEA Plus-Direct Composite which was created on December 1, 2011. This composite includes accounts that pursue the IDEA Plus strategy, but have a different fee structure. Gross returns from the IDEA Plus-Direct Composite include transaction costs and net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. A complete list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period. The IDEA Plus Composite contains fully discretionary IDEA Plus wrap accounts. IDEA Plus is a dividend-based equity strategy combined with a covered call option strategy on the S&P 500 Index. Approximately 75% of the portfolio is the Confluence IDEA Plus portfolio which invests in high-quality companies that have paid & increased dividends over the last 10 years. The remaining 25% consists of an ETF position in the S&P 500 Index with a corresponding covered call position, although this allocation can range, at times, from 15% to 40% of the portfolio. **Results shown for the year 2011 represent partial period performance from December 1, 2011, through December 31, 2011. N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.

³ Historical Return & Risk Chart—Volatility is calculated taking the square root of the standard deviation of the single month-end return in Dec. 2011 & quarterly returns thereafter. S&P 500/CBOE BXM represents the strategy's primary (blended) benchmark above. The S&P 500[®] is shown to represent U.S. equity performance and for illustrative purposes only. (Data source: Confluence/Bloomberg, using monthly & quarterly returns)

⁴ Statistical Analysis—Downside Capture Ratio: Measures performance in down markets relative to index (down market: any quarter where the market return is less than zero); lower Downside Capture Ratio indicates manager protected capital better during a market decline. Alpha: Measures nonsystematic return or return that cannot be attributed to the market, i.e., how manager performed if the market had no gain or loss. Beta: Measures portfolio volatility (systematic risk) compared to an appropriate benchmark index; e.g., Beta of 1.1 indicates the investment has approx. 10% more volatility in returns than benchmark index. Standard Deviation: Measures price variability (risk) over a period of time; higher Standard Deviation indicates more variability in returns. R-Squared: Indicates whether comparison index is an appropriate benchmark based on correlation; generally, R-Squared above 0.70 is desirable. Sharpe Ratio: Quantifies risk-adjusted performance by measuring excess return per unit of risk; higher Sharpe Ratio suggests better risk-adjusted performance. (Data source: Zephyr's PSN SMA Database)
