

OBJECTIVE

Primarily focused on reliable income exempt from federal taxation with a secondary focus on growth.

INVESTMENT PHILOSOPHY

Asset allocation is a portfolio management process where various asset classes are combined in one portfolio. Properly implemented, asset allocation is a time-tested approach that addresses risk through diversification. The Confluence approach to asset allocation is different than traditional asset allocation approaches which rely on long-term historical averages for strategic capital market assumptions. Confluence recognizes that risk levels and return potential rise and fall over market and economic cycles. Therefore, we apply an adaptive process in which the Confluence team estimates the performance of 12 different asset classes in terms of risk, return, and yield looking forward 3 years. This cyclical approach is not market *timing*. Rather, the intention is to remain within an acceptable risk profile, while changing the asset class mix to optimize return potential. We may adjust allocations in much shorter time frames, depending upon changing views of the marketplace and economy. Alternately, we may abstain from making significant allocation adjustments if we believe the existing posture remains optimal. The process may involve somewhat higher turnover than a more static strategic program, but usually involves less trading relative to tactical approaches.

The asset allocation portfolios utilize exchange-traded funds (ETFs). We may use ETFs that allow us to focus on or avoid particular industry sectors, bond maturities, commodities, or countries.

OVERVIEW

- ◆ Focus is oriented toward reliable income exempt from federal taxation, moderate volatility, long-term growth, and principal preservation
- ◆ Allocation in municipal bond fixed income asset classes, usually with an emphasis on U.S. investment-grade fixed income
- ◆ Portfolio may include real estate, equities, commodities, or other asset classes that contribute growth potential and diversification benefits
- ◆ Profile similar to that of a diversified municipal bond portfolio alongside an equity allocation
- ◆ Appropriate for investors with a conservative risk tolerance
- ◆ Strategy assets: \$27.4 million¹

¹ Total strategy assets include assets under management (AUM) and assets under advisement (AUA). As of 12/31/22, AUM = \$5.1 million and AUA = \$22.3 million.

OVERALL MORNINGSTAR RATING™

Among 412 separate accounts in the Moderately Conservative Allocation category. This separate account was rated 5 stars/412 separate accounts (3 years), 5 stars/363 separate accounts (5 years) based on risk-adjusted returns. As of 9/30/23. ⁷

iShares iBonds Dec 2025 Term Muni Bond ETF - IBMN	8.8%
Invesco S&P Midcap Quality ETF - XMHQ	6.6%

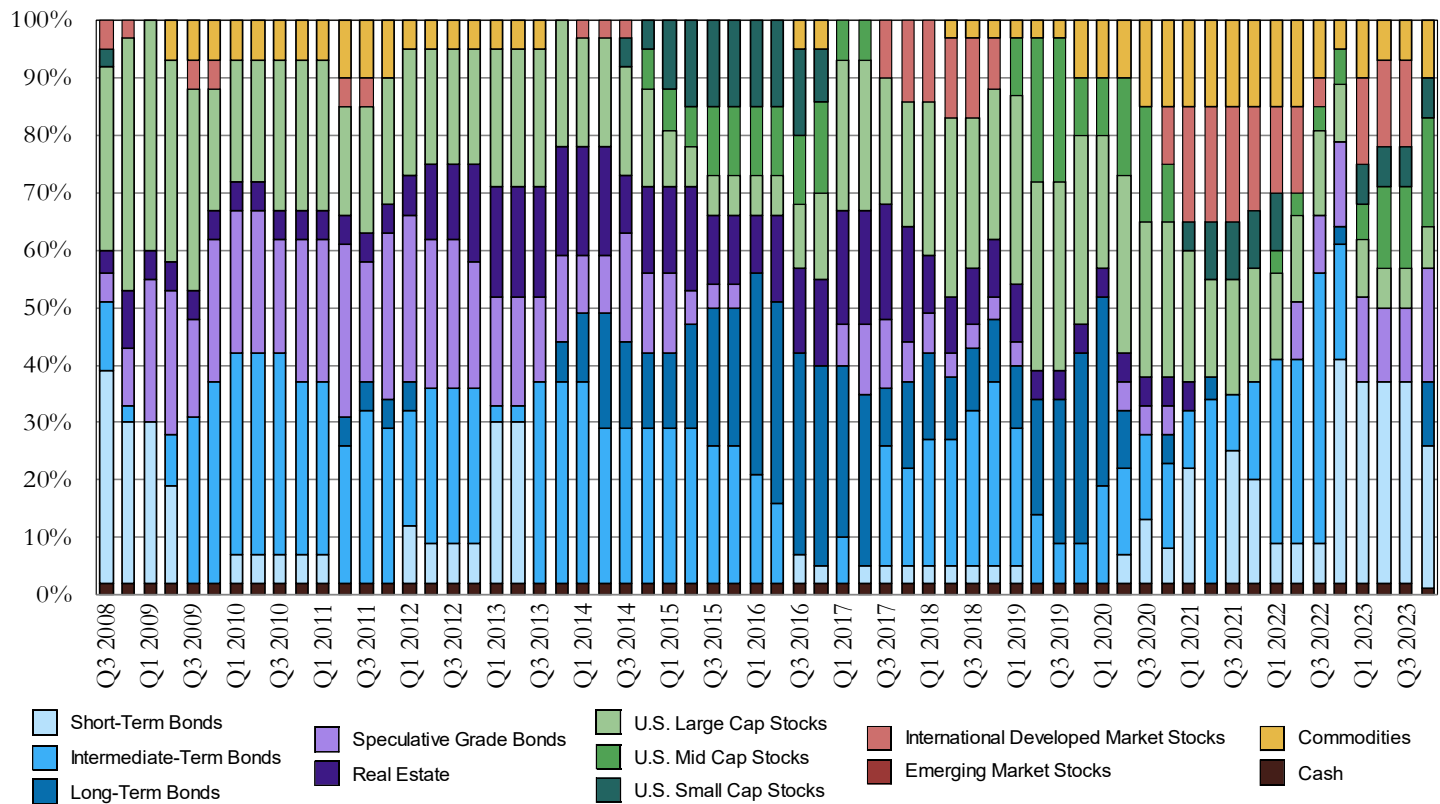

ASSET ALLOCATION

RECENT PORTFOLIO CHANGES³

We extended duration in the Income Tax-Exempt with Growth strategy by adding a long-term municipal bond position, which provides a measure of safety against elevated geopolitical risks. Additionally, we increased exposure to high-yield municipal bonds for their attractive yields. The allocation to mid-cap equities was increased as current valuations and fundamentals look attractive, which includes the addition of a uranium producers industry ETF to take advantage of the structural shift in energy production. We liquidated the international developed market equity position as we find more attractive opportunities domestically for investors with moderate risk tolerance. The commodity exposure was supplemented with a broad-based commodity ETF, while maintaining a position in gold.

DISCLOSURES

²Current Portfolio—Information presented reflects wrap account composites with taxable income (if applicable). Asset allocations shown represent the individual ETFs used in the model portfolios as of 10/19/23 and do not represent the precise allocation of assets in an actual client account. Asset allocation in client accounts may vary based on individual client considerations and market fluctuations. The investments held by the portfolio are not guaranteed and do carry a risk of loss of principal. Each asset class has specific risks associated with it and no specific asset class can prevent a loss of capital in market downturns. Individual client portfolios may differ, sometimes significantly, from these listings. Yield data source: Morningstar. 30-day SEC yield of the model portfolio as of 10/19/23. Annual turnover 3-year rolling calculated from sample accounts for periods ending 12/31/2022.

³Recent Portfolio Changes—The investment or strategy discussed may not be suitable for all investors. Investors must make their own decisions based on their specific investment objectives and financial circumstances.

⁴Performance Composite Returns—Confluence Investment Management LLC claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Confluence Investment Management LLC has been independently verified for the periods August 1, 2008, through December 31, 2022. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards.

Verification provides assurance on whether the firm's policies and procedures related to composite maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. The Income Tax-Exempt with Growth strategy was inceptioned on December 1, 2008, and the current Income Tax-Exempt with Growth-Plus Composite was created on April 1, 2015. Confluence Investment Management LLC is an independent registered investment adviser. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

⁵Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.

⁶Net-of-fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly. This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 0.40% on the first \$500,000; 0.35% on the next \$500,000; and 0.30% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Bundled fee accounts make up 100% of the composite for all periods. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

A complete list of composite descriptions is available upon request. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request. The annual composite dispersion is an equal-weighted standard deviation, using gross-of-fee returns, calculated for the accounts in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns over the preceding 36-month period. The Income Tax-Exempt with Growth-Plus Composite contains fully discretionary Income Tax-Exempt with Growth-Plus wrap accounts. The Income Tax-Exempt with Growth strategy is implemented using ETFs and the investment objective is the pursuit of nominal returns (yield and growth) in excess of inflation, subject to the limitations of the risk constraint for the Income Tax-Exempt with Growth strategy. Although the portfolio typically favors an allocation to tax-exempt fixed income asset classes, a smaller portion of the portfolio may include real estate, equities, commodities, or other asset classes. These allocations provide an aspect of growth potential and diversification benefits. This portfolio may be appropriate for investors with a conservative risk tolerance.

****Results shown for the year 2015 represent partial period performance from April 1, 2015, through December 31, 2015.**

N/A-Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A-3yr Std Dev: Composite does not have 3 years of monthly performance history.

Inflation is provided as additional information and is represented by the U.S. 5-year TIP breakeven spread (Bloomberg: USGGBE05 Index), which had 3-year standard deviation as follows: 0.1% 2018, 0.1% 2019, 0.1% 2020, 0.2% 2021, 0.2% 2022.

⁷Overall Morningstar Rating™—Information provided is for educational/illustrative purposes only and should not be construed as individualized advice, recommendation, or endorsement of any investment strategy. Information is not intended to forecast or predict future performance. Past performance is no guarantee of future results. Ratings are objective, based entirely on a mathematical evaluation of past performance, and based on gross-of-fees performance (before deduction of advisory fees). Net performance information is available on the Confluence website. Ratings should not be considered a buy or sell recommendation. Confluence provides compensation to Morningstar, Inc. for use of their analytics systems/database as well as for permission to publish these ratings.

Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information.

The Morningstar Rating™, or "star rating," is calculated for separate accounts with at least a three-year history. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. **As of 9/30/2023.**
