

Equity Strategies • Small Cap Value

Small Cap Value is focused on companies that generally have capitalizations below \$2 billion. These companies are selected using a bottom-up, fundamental research process that seeks to identify individual businesses that possess competitive advantages and that are trading at substantial discounts to our estimates of intrinsic value. The portfolio typically comprises 30-35 holdings and is expected to result in low to moderate turnover. The strategy is suitable for clients whose primary objective is capital appreciation.

Strategy Commentary

Small cap equity markets continued their upward trajectory in the second quarter, with the Russell 2000 up 2.1% and the Russell 2000 Value up 1.4%. This follows a very strong start to the year when the Russell 2000 was up 14.6% and the Russell 2000 Value was up 11.9% in the first quarter, bringing their year-to-date returns to 17.0% and 13.5%, respectively. Small Cap Value also experienced a solid second quarter, up 4.1%, which followed a strong first quarter return of 14.1%, bringing its year-to-date return to 18.8% (all gross of fees). *(The strategy was up 3.3% QTD and 17.0% YTD (net of fees). Q1 2019 was up 13.2% (net of fees). Net of fees calculated using the highest applicable annual bundled fee of 3.00%. See performance disclosures on p.2 for fee description; actual investment advisory fees may vary.)*

Despite being up for the quarter, it was a more volatile quarter than the first with the Russell 2000 experiencing a high-single-digit decline during the month of May. Investor sentiment has been swaying between the prospects of additional FOMC rate cuts coming this summer and slowing domestic economic growth, which may be attributable to the trade tariff uncertainty. All-in-all, investors appear cautiously optimistic about the FOMC actions and the direction of trade discussions, resulting in a strong start to the year. Of course, this is set against the backdrop of an economic expansion that began in 2009 and is approaching the longest, albeit one of the weakest, expansions since 1850.

With small caps posting marginally positive returns, it was a relatively mixed quarter at the sector level, with six of the 11 sectors posting negative returns for the indices. This compares to our Small Cap Value strategy which had just two sectors, Consumer Discretionary and Real Estate, post negative results. Overall, returns in the Small Cap Value strategy were rather broad, with Frontdoor, John Bean Technologies and RBC Bearings posting strong returns, while Movado, Potbelly and RE/MAX were down in the quarter.

The only change during the quarter was the sale of Luxoft as it was acquired by DXC Technology in June. Our focus remains on businesses that generate above-average shareholder value over long periods and view volatility as an opportunity to find such business trading at attractive valuations.

The top-performing and worst-performing positions during the quarter were as follows:

Security	Avg Weight	Contribution
Top 5		
Frontdoor, Inc.	5.11	1.23
John Bean Technologies Corporation	3.32	0.92
RBC Bearings Incorporated	3.05	0.88
Cannae Holdings, Inc.	4.41	0.81
i3 Verticals, Inc.	3.53	0.77
Bottom 5		
Varex Imaging Corporation	2.45	(0.26)
Monotype Imaging Holdings Inc.	2.76	(0.46)
RE/MAX Holdings, Inc.	2.54	(0.54)
Potbelly Corporation	1.12	(0.57)
Movado Group, Inc.	3.32	(1.00)

(Contribution data shown from a sample account)

Going forward, we expect volatility to persist as uncertainty continues around trade policies and FOMC actions (particularly regarding the timing and magnitude of changes to monetary policy). We expect inflation and inflation expectations to remain near current levels which supports market valuations. As always, we remain focused on company-specific fundamentals and growth prospects and believe the current market will continue to provide us with opportunities to buy quality companies at reasonable prices.

ABOUT CONFLUENCE INVESTMENT MANAGEMENT LLC

Confluence Investment Management LLC is an independent Registered Investment Advisor located in St. Louis, Missouri that was founded in 2007. Confluence provides professional portfolio management and advisory services to institutional and individual clients. The firm's investment philosophy is based upon independent, fundamental research that integrates evaluation of market cycles, macroeconomics and geopolitical analysis with the firm's value-driven, fundamental company-specific approach. Confluence's portfolio management philosophy begins by assessing risk and follows through by positioning clients to achieve their income and growth objectives.

Portfolio Benchmarks

Russell 2000® Index – A capitalization-weighted index measuring performance of approximately 2,000 companies in the Russell 3000® Index.

Russell 2000® Value Index – A capitalization-weighted index designed to measure performance of those Russell 2000® Index companies with lower price-to-book ratios and lower forecasted growth values.

Confluence claims compliance with the Global Investment Performance Standards (GIPS®).

The Small Cap Value Strategy was inception on October 1, 1994 and the current Small Cap Value Composite was created on August 1, 2008. Performance presented prior to August 1, 2008 occurred while the Portfolio Management Team was affiliated with a prior firm and the Portfolio Management Team members were the primary individuals responsible for selecting the securities to buy and sell. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of all fees and include the reinvestment of all income.

¹ Pure gross returns are shown as supplemental information to the disclosures required by the GIPS® standards.

² Net of fee performance was calculated using the highest applicable annual bundled fee of 3.00% applied quarterly (2.75% prior to 7/1/08). This fee includes brokerage commissions, portfolio management, consulting services and custodial services. The Confluence fee schedule for this composite is as follows: 1.00% on the first \$500,000; 0.90% on the next \$500,000; and 0.75% over \$1,000,000. There are no incentive fees. Clients pay an all-inclusive fee based on a percentage of assets under management. The collection of fees produces a compounding effect on the total rate of return net of fees. Bundled fee accounts make up 100% of the composite for all periods. Actual investment advisory fees incurred by clients may vary. Wrap fee schedules are provided by independent wrap sponsors and are available upon request from the respective wrap sponsor.

A complete list of composite descriptions and/or fully compliant GIPS® presentations are available upon request. Additional information regarding policies for calculating and reporting performance are available upon request. The annual composite dispersion is an equal weighted standard deviation calculated for accounts in the composite for the entire year. The Small Cap Value Composite contains fully discretionary Small Cap Value wrap accounts. Small Cap Value is a value-based, bottom-up portfolio that utilizes stocks with a market capitalization typically less than \$2 billion. Smaller capitalization companies, due to their size, are generally more vulnerable to adverse general market or economic developments than larger, more established companies.

**Results shown for the year 1994 represent partial period performance from October 1, 1994 through December 31, 1994. N/A - Composite Dispersion: Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year. N/A - 3yr Std Dev: Composite does not have 3 years of monthly performance history and/or performance was calculated quarterly prior to Jan 2001.

Individual holding performance and contribution methodology as well as a list of every holding's contribution to the strategy can be obtained by contacting Confluence. Material is published solely for informational purposes and is not an offer to buy or sell or a solicitation of an offer to buy or sell any security or investment product. Holdings identified do not represent all of the securities purchased, sold or recommended. Information is presented as supplemental information to the disclosures required by GIPS® standards. Opinions and estimates are as of a certain date and subject to change without notice. Investment or investment services mentioned may not be suitable to an investor and the investor should seek advice from an investment professional, if applicable. Past performance is no guarantee of future results. There can be no assurance that a purchase of the stocks in this portfolio will be profitable, either individually or in the aggregate, or that such purchase will be more profitable than alternative investments, including the risk that our estimate of intrinsic value may never be realized by the market or that the price goes down. Indices: The S&P 500 Index and Russell 3000 Value Index are shown as additional information. These indices are unmanaged. An investor cannot invest directly in an index. They are shown for illustrative purposes only & do not represent the performance of any specific investment. Index returns do not include any expenses, fees or sales charges, which would lower performance.
